

# Teófilo Fontainhas Neto

## Mobile Logistics

**Teófilo Fontainhas Neto**, reference **distributor partner of Unicer** in the trade of wide range of drinks, also operates in the market of processing and commercialization of dried fruit (carob), one of the oldest companies in the market.

The complexity of its services and increase turnover led to their needs for warehouse logistics become more complex. **Mobile Logistics** has been successfully implemented in this company, which saw the completion of its modernized inventory, warehouse management simplified and organized by location.

### EXECUTIVE SUMMARY

**Customer:** Establishments of Teófilo Fontainhas Neto - Trade and Industry, SA

**Sector:** Commercialization / Distribution of beverage and transformation of carob

**Location:** São Bartolomeu de Messines

### CHALLENGE

- ▶ Software Change;
- ▶ Integrated solution that addresses the specific needs of this sector;
- ▶ Simplify tasks (inventory);
- ▶ Management of locations.

### APPROACH

- ▶ Adopting a complete logistics solution for warehouse, fully integrated with the current management system ERP PRIMAVERA, which responds to the needs of management for locations and inventory recounts.

### RESULTS

- ▶ Decrease of teams allocated to processes;
- ▶ Time savings in inventory tasks;
- ▶ Reduction in procedural time by 50%;
- ▶ Reduction in inventory errors 80%;
- ▶ Dematerialization of information;
- ▶ Savings of 1 day for annual inventory.

### CHALLENGE

**Teófilo Fontainhas Neto**, linked to the commercialization and distribution of beverages and dried fruit Sector Company, was faced with several issues that hindered one of the necessary tasks of the company, inventory.

Presented very complex inventories, many hours and several human resources dedicated exclusively to this task, getting this extremely time consuming and expensive process for the company.

*“Too much time spent in conducting inventories, which hurt the company’s productivity because we had too many people involved and dedicated exclusively to this task.”*

*Augusto Ramos, Administrator, Teófilo SA*

*“The Mobile Logistics Solution provided by Algardata, permits to reduce the time spent in performing inventories by about 50%, reduces inventory errors by 80%, as well as human resources required for this task.”*

*Augusto Ramos, Administrator, Teófilo SA*

## APPROACH

The next step could only be adopting a new solution. Being Teófilo Fontainhas Neto Algardata partner for over 10 years, one of the visits from the account manager have been addressed some of these grievances, which concluded the need to choose a new solution for effective management of logistics warehouse to avoid errors occurring and resources spent. By Teófilo Fontainhas Neto was still made some queries to the market, but quickly the Mobile Logistics, was elected as the appropriate integrated solution to meet the logistical needs of this company.

*“The Mobile Logistics Solution it is fully integrated with our ERP PRIMAVERA, which means that we have full access to data in real time, allowing you to manage all logistics for warehouse locations and with this reduces the number of inventory recounts.”*

Augusto Ramos, Administrator, Teófilo SA

## ADVANTAGES

- ▶ Simple and intuitive software;
- ▶ Speed and efficiency in inventories;
- ▶ Organization and segmentation by warehouse locations;
- ▶ Dematerialization of information;
- ▶ Saving cost / time;
- ▶ Reduction of counting errors.

## IMPLEMENTED SOLUTIONS

- ▶ Mobile Logistics – Warehouse Management System
- ▶ Integration: ERP PRIMAVERA (existing customer)

## IMPLEMENTATION

Once that the customer has already adequate technological equipment, the 1<sup>st</sup> phase of implementation was dedicated to an organization of the warehouse. Process was completed in about three days. After this task, there was the organization of work teams for carrying out inventories by location, at this stage the main barrier detected was the adaptation by employees to the new warehouse management system. Completely new system and integrated with ERP PRIMAVERA, which automates many of the tasks previously performed by teams of logistics.

After the reorganization of space and procedures, proceeded to the physical count and the analysis differences phase. This in turn ran smoothly and the teams were properly organized being held in a single day. Situation which in previous years had never happened.

*“We conducted a physical count and analysis of differences in just one day, which was not observed in previous years. We implemented the Mobile Logistics, at the right time!”*

Augusto Ramos, Administrator, Teófilo SA

With the implementation of Mobile Logistics, there is a significant improvement of the entire logistics / warehouse process, reducing error count, reducing procedural time in half, using less manpower involved, as well as a reduction in maintenance costs, equipment and the proper software updates.

*“After implementation of Mobile Logistics, the difference registered with the closure inventory comparing with the volume of goods it is insignificant. We have reduced the inventory errors by 80%.”*

Augusto Ramos, Administrator, Teófilo SA
